Maximum Marks	4 Marks

Signs with smart connectivity for Better road safety

The screenshot shows the IBM Cloud Account settings page in a web browser. The browser's address bar displays 'cloud.ibm.com/account/settings'. The page features a dark sidebar on the left with navigation links: Account, Account resources, Account settings (highlighted), IBM Cloud Shell settings, Notification distribution list, Classic Infrastructure, Subscriptions, Audit log, and Company information. The main content area is titled 'Account settings' and includes sections for 'Account' (Madhan Kumar S's Account, ID: 6fc9e8e7f6475473e9979cc0028229a7d), 'Account Type' (Trial (Free), 53 days remaining in Trial), and 'Account upgrade' (Pay-As-You-Go and Subscription options). A right-hand panel shows the user's profile 'Madhan Kumar S' with links for Profile, Log in to CLI and API, Privacy, Change theme, and Log out. The bottom of the page shows a Windows taskbar with the date and time as 09-11-2022, 18:25.

Cloud Foundry

Public

Deploy and run your applications without managing servers or clusters with IBM Cloud Foundry

Cloud Foundry automatically transforms source code into containers, scales them on demand, and manages user access and capacity.

Cloud Foundry in the IBM Cloud

Public Applications

Create and deploy apps on IBM Cloud's multi-tenant Cloud Foundry environment available in 5 IBM Cloud Regions. Get started in minutes by deploying your applications, and let IBM Cloud manage them for you.

IBM Cloud Foundry Public is being deprecated. Please see [full details](#).

Satellite

Locations Clusters Cluster resources Configurations Documentation

Run IBM Cloud services anywhere

Consume IBM Cloud services anywhere you need them and consistently deploy, manage, and control your workloads across public cloud, on-prem, and edge environments with IBM Cloud Satellite.

Create a Satellite location

Satellite capabilities

IBM Cloud services anywhere
Use a single API to create a Satellite location and add host machines from your on-prem data center, edge devices, or other cloud providers. Then, the hosts power IBM Cloud

Consistent app deployments
Create, version control, update, and review your app configurations across all your OpenShift clusters from a single pane. You can consistently deploy and run your apps in the public

Network traffic management
Control and audit the network traffic and communication flow between your OpenShift clusters with a built-in, application-level firewall, and use IBM Cloud monitoring and logging services
